

## Benefits

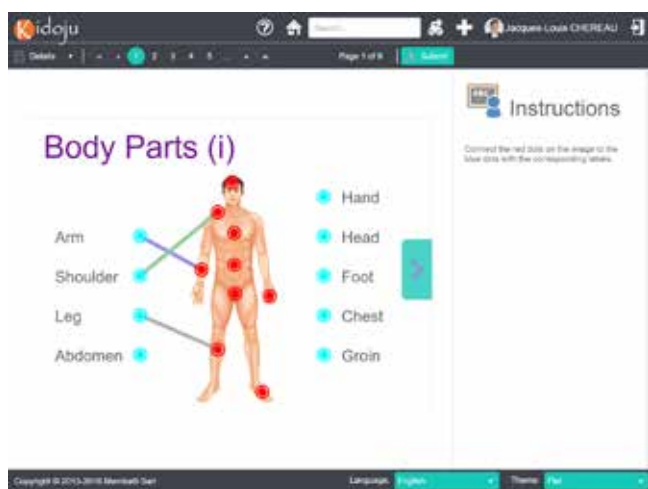

Quizzes help students remember because the retrieval effort aids memory retention. Quizzes also help identify gaps in knowledge to encourage further learning. Computer automation entails frequent testing and immediate corrections, which favours a motivating learning momentum. Playing quizzes on mobile devices while away from a desk is time-efficient and fun.

Studies have further demonstrated that testing produces better organization of knowledge, promotes retention of non-tested but related material, enhances learning during future study sessions, and improves transfer of knowledge to new contexts.

**“Everyone deserves a chance to be phenomenal.”**

technology. Other sites are community driven but the level of interaction of quizzes that can be contributed is limited to flash cards, multiple choice questions or short answers.

Kidoju is the only free web site that offers the best of both categories. Using a browser-based designer like Power-Point and a rich tool set, any teacher can produce highly-interactive knowledge tests without programming skills. Using the HTML player any student can consume these highly-interactive self-corrected tests and measure their progresses. Public tests are free forever.

Testing often also provides teachers with constant feedback about their students' knowledge and performance. Teachers in turn can adapt their teaching, suggest behavioural improvements or recommend further reading. Automatic grading reduces the burden of manual corrections and teachers can spend more time educating. And a paper-less organisation is also eco-friendlier as it spares the cost of photocopies.

## Features

There are many quiz web sites, which fall into two categories. Some sites have a fixed number of highly interactive quizzes developed by computer programmers, especially using Adobe Flash, an obsolete

Currently the Kidoju tool set includes audio and video players, mathematic expressions, connectors and drag-able images and labels, in addition to multiple choice questions and short answers. This tool set expands periodically as new software versions are released.

## What's Next

Quizzes are not only for schools, teachers and students. Education is also a personal development challenge in the corporate world. Businesses benefit from educating their employees and customers.

So whoever you are, go to [www.kidoju.com](http://www.kidoju.com) to produce or consume highly-interactive self-corrected knowledge tests. It is free. All you need is a recent web browser.
